

DOI Work Activity 01 - Plan For Protection Of Historic Structures

Program Area:	Cultural/Heritage – Special Areas
End Outcome Goal:	PEO.3 - Protect Cultural and Natural Heritage Resources
Intermediate Outcome:	This activity does not align to an intermediate outcome
DOI Sub process:	2a - Plan (prepare resource use & mgmt plans)

Examples/Notes:

Work Activity Description: Includes all research and planning intended to protect historic structures by slowing the rate at which historic material is lost, and maintaining historic character. Such planning typically produces activity plans that refine the broad program objectives stated in a land use plan (GMP, RMP, MFP, etc.), outline an implementation strategy for decisions made in the land use plan, and apply best management practices to meet land use objectives.

An historic structure is "a constructed work . . . consciously created to serve some human activity." Historic structures are usually immovable, although some have been relocated and others are mobile by design. They include buildings and monuments, dams, millraces and canals, nautical vessels, bridges, tunnels and roads, railroad locomotives, rolling stock and track, stockades and fences, defensive works, temple mounds and kivas, ruins of all structural types, and outdoor sculpture.

Research on, planning for, and stewardship of historic structures focus on slowing the rate at which historic material is lost, and maintaining historic character. Research defines historical associations, integrity, character, and the causes of material deterioration; planning develops and evaluates proposals for use and treatment in terms of their likely effects; and stewardship entails activities ranging from craft training to the identification and mitigation of threats.

This work activity includes all costs associated with planning, and the necessary research, necessary to protect historic structures by slowing the rate at which historic material is lost, and maintaining historic character and may include: staff time for preparation of activity plans, collaboration (outreach, meetings, public meetings, etc.) with other entities and the public, consultation with tribes, Section 106 analysis, compliance with The Secretary of the Interior's Standards for Rehabilitation, NEPA analysis (including T&E consultation and review), coordination and cross-walking with other existing implementation plans, third party contracting, etc. It also includes costs associated with document preparation such as printing, collating, and distribution; training associated with preparing staff to complete these plans; research and data searches; and GIS associated activities.

Output: New or revised Historic Structure Report	Unit of Measure: Number(s) of new or revised Historic Structure Reports (activity plan) completed during the fiscal year. Report new or revised activity plans when the decision document for the plan is signed. Revisions include a modification of a significant portion of the decisions in the activity plan. Do not report minor amendments or changes in these plans, even though these costs may be charged to this work activity.
